

Activities conducted by Alumni Association

Alumni activities serve as a dynamic way to keep former students engaged with their alma mater while fostering a sense of connection and pride. These activities range from social gatherings to professional development opportunities, all designed to strengthen the bonds between alumni and their institution, as well as among alumni themselves. The essence of alumni activities is rooted in the idea that education doesn't end at graduation—rather, it is the beginning of a lifelong relationship with the institute and a lasting commitment to supporting the institution and its future.

Alumni talks are conducted at PIBM, wherein students are guided for latest industry trends and job opportunities in the market. Expert guidance sessions on latest IT technologies are conducted every year by the alumni. Sessions on career counselling are also conducted by alumni. Below are some activities conducted by our alumni.

- Alumni Talk (National & International)
- Selenium Hands-on Training by Ms.Daraksha Tamboli
